Office Document Demo

This is a demo ODT (OpenDocument Text) file to showcase Static Flow's office document support.

Features

Static Flow can convert various office formats to PDF:
- ODT - OpenDocument Text
- DOCX - Microsoft Word
- PPTX - Microsoft PowerPoint
- ODS - OpenDocument Spreadsheet

How It Works

During the build process, Static Flow uses LibreOffice in headless mode to convert office documents to PDF format, making them viewable in any web browser.

Requirements

LibreOffice must be installed on your system. Run "staticflow setup" to check if it is available.
